

June 17-19, 2015  
KRAKÓW

### Keynote Presentations

#### Panos Antsaklis

University of Notre Dame, USA

#### Karl Henrik Johansson

KTH Royal Institute of Technology,  
Sweden

#### Yannis Tsividis

Columbia University, USA

### Plenary Presentations

#### Tobi Delbrück

ETH Zurich, Switzerland

#### Maurice Heemels

Eindhoven University of Technology, The  
Netherlands

#### Jan Lunze

Ruhr-University Bochum, Germany

### Honorary Co-Chairs

#### Marek Florkowski

ABB Krakow, Poland

#### Tadeusz Pisarkiewicz

AGH Univ. of Science & Technology,  
Poland

### General Co-Chairs

#### Sebastian Dormido

UNED, Spain

#### Marek Miśkiewicz

AGH Univ. of Science & Technology,  
Poland

### Organizing Chair

#### Richard Zurawski

ISA Group, USA & AGH Univ. of Science  
& Technology, Poland

### Program Committee Co-Chairs

#### Ming Cao

University of Groningen,  
The Netherlands

#### Laurent Fesquet

Grenoble Institute of Technology, France

### Workshops Co-Chairs

#### José Sánchez Moreno

UNED, Spain

#### Antonio Visioli

University of Brescia, Italy

### Work-in-Progress Co-Chairs

#### Manuel Mazo

TU Delft, The Netherlands

#### Sebastian Trimpe

Max Planck Institute for Intelligent  
Systems, Tübingen, Germany

### Special Sessions Co-Chairs

#### Sylvain Durand Chamontin

ISM, Marseille, France

#### José Luis Guzmán Sánchez

University of Almería, Spain

# IEEE International Conference on Event-based Control, Communications & Signal Processing

Call for Papers to Special Session SS06

## Pixel-Level Event-Driven Vision Sensing, Processing, and Infrastructures

### Special Session Organizers

Tobi Delbrück, Institute for Neuroinformatics

ETHZ (Zurich, Switzerland), [tobi@ini.phys.ethz.edu](mailto:tobi@ini.phys.ethz.edu)

Bernabé Linares-Barranco, Instituto de Microelectrónica de Sevilla

IMSE-CNM (CSIC and Univ. Sevilla), [bernabe@imse-cnm.csic.es](mailto:bernabe@imse-cnm.csic.es)

#### Aim and scope:

Biological and Artificial Vision Systems differ fundamentally in the way visual scenes are sensed and processed: in conventional artificial vision systems a camera sensor captures sequences of still frames, which are processed afterwards frame by frame; in biological eyes and subsequent cortical processing there is no notion about the "frame" concept nor about a "frame rate". In biology, retina cells send asynchronous spikes to cortex which represent some pixel-level (or pixel-surrounding-level) "scene event". Event-driven vision sensors, also called Address-Event-Representation (AER) artificial retinas, have been around for about two decades now, but restricted to neuromorphic enthusiasts research laboratories. Since the advent of the first Dynamic Vision Sensor (DVS), which is a special AER sensor sensitive to pixel-level relative light changes, this enthusiasm is slowly and shyly expanding to other disciplines as well as to industry.

In this Special Session the aim is to present aspects of event-driven sensing, event-driven processing for both low level as well as higher level more cognitive tasks, but also ping on infrastructure aspects necessary for this new but growing technology.

#### Topics within the scope of the Special Session:

The following is a list of non-exclusive topics that can be covered within this Special Session:

- event-driven computation techniques for vision
- event-driven stereo vision techniques
- event-driven vision filtering techniques
- event-driven sensor applications
- event-driven infrastructure techniques

**Submission of Papers:** The working language of the conference is English. The special session papers are limited to 8 double column pages in a font no smaller than 10-points. Manuscripts must be submitted electronically in PDF format, according to the instructions contained in the Conference web site.

**Further Information:** EBCCSP 2015 Conference Secretariat: Tel: + 48 12 617 3034, Fax: + 48 12 633 2398; Email: [ebccsp15@agh.edu.pl](mailto:ebccsp15@agh.edu.pl)

**Paper Acceptance:** Each accepted paper must be presented at the conference by one of the authors. The final manuscript must be accompanied by a registration form and a registration fee payment proof. All conference attendees, including authors and session chairpersons, must pay the conference registration fee, and their travel expenses.

**No-show Policy:** The EBCCSP 2015 Organizing Committee reserves the right to exclude a paper from distribution after the conference at IEEE Xplore if the paper is not presented at the conference.

#### Author's Schedule:

*Deadline for submission of special sessions papers:*

March 15, 2015

*Notification of acceptance of special sessions papers:*

April 8, 2015

*Final manuscripts due – special sessions:*

May 15, 2015
