20th Jubilee

This year we are celebrating our 20th anniversary - we wish to thank all our Editors, Authors, Readers and Friends for their continuous support, which has contributed to our current steady and valuable position. For some history of AMCS, please visit [our website](#).

Latest issue

The latest issue of AMCS, 2011, Vol. 21, No. 1, has just been published. It contains a special section on *Semantic Knowledge Engineering*, edited by Grzegorz J. Nalepa and Antoni Ligęza, and covers altogether 15 papers. We wish to thank the Guest Editors and Authors for their cooperation with us on this issue.

You can access the contents by visiting [our website](#).

Forthcoming issue

The next issue, 2011, Vol. 21, No. 2, will contain a special section on *Efficient Resource Management for Grid-Enabled Applications* and will be published towards the end of June 2011.

Recommended reading

We would like to draw our Readers' attention to the following recent articles:

[A unified approach to stability analysis of switched linear descriptor systems under arbitrary switching](#) by Guisheng Zhai and Xuping Xu (2010, Vol. 20, No. 2), dealing with a unified approach to stability analysis for switched linear descriptor systems under arbitrary switching in both continuous-time and discrete-time domains that is based on common quadratic Lyapunov functions incorporated with linear matrix inequalities (LMIs).

[Optimization schemes for wireless sensor network localization](#) by Ewa Niewiadomska-Szynkiewicz and Michał Marks (2009, Vol. 19, No. 2), providing an overview of centralized distance-based algorithms for estimating the positions of nodes in a sensor network.

2011 Subscription

For timely and steady supply of AMCS, please subscribe to the print version of our journal through [our website](#).
