5th EESTEC Competition for Android

I was a member of the Jury of [5th EESTEC Competition for Android](#)

EESTEC Competition for Android

EESTEC Competition for Android is open to Android enthusiasts from all over the world. This academic event aims at opening doors for creative innovation by putting into practice knowledge about programming and design.

In the past years, the usage of applications has reached immense popularity and their usefulness slowly transformed from what was merely a luxurious advantage into a basic tool for daily needs in terms of information, communication, mobility, entertainment etc.

Because Android has become a part of our everyday life, we ought to participate in enhancing the quality of the services that the platform provides. As young students and free thinkers, we can bring ourselves to understand the needs of our generation and help fulfill them.

The 5th EESTEC Competition for Android is a great experience not only because it teaches students about useful technical tools – it also pushes them to research and analyse in order to meet a demand.

This event will be an amazing opportunity for the developers to gain experience about programming and design, show their creativity, and build an application that could be used by millions of people from all around the globe.
