**THE PROS AND CONS OF TECHNOLOGY**

Technology is making a reality of what only yesterday was but a dream. It benefits for vast numbers of people. One may call it a blessing because it does not threaten man’s interests. We have to use it carefully because the same inventions which save human life and the world can also be used to produce dangerous weapons or chemicals which may threaten our planet. Another problem that “the machine age” has brought us is pollution and waste. The development of nuclear power, pesticides and the plastics industry have introduced serious hazards into the environment. Our planet may be impossible to soon.

Moreover, we are helped by so many machines that we have become lazy and have adopted an unhealthy way of life. Cars take us everywhere quickly and easily but at the same time the atmosphere and clutter up the cities which are not able to accommodate them all. On the other hand, having a computer and a telephone link, some people do not even have to leave their homes to do their daily work and to communicate with the world outside, which in turn may lead to isolation and frustration.
