Dear Editor,

This is a very thoroughly revised version of the article entitled: **“Simple semi-automatic system for the determination of methylmercury with the gas chromatography - atomic fluorescence method, ref.: MEAS-D-17-00404**

To match better the article content, the title has been changed to:

“Semi-automatic system for methylmercury determination in biota samples”

The results of the new measurements, new tables and figure were added to the article. The construction of the article was changed in order to make it more transparent. The file manuscript_changes.doc is a part of this submission. The new or changed text is highlighted with a red color.

I believe that the current version of manuscript would match the standards and requirements of your Journal.

Yours sincerely,
Jerzy Górecki
